

Deer Valley Farm's
COMPLETE
Dispersal
LIMOUSIN

Saturday, May 16th, 2009

Dear Fellow Breeders,

It is with very mixed emotions that I write this letter, I can honestly say that this is a letter that I never figured to write at Deer Valley. But, as many of you know, history is formed by the changes in direction that occur over time. No one ever knows what those changes in direction will be nor can we predict when they will occur. Over the last few years we have seen many changes at Deer Valley and for that reason and with great consideration this is the direction that we have chosen to take. The dedication to the Limousin breed has been a 21 year commitment and has been one that Fred, Kim and the entire crew at Deer Valley has diligently and happily pursued each and every day. We have built some tremendous relationships and created some outstanding friendships that we hope will continue and endure over the years to come no matter what course we choose. We believe that our list of accomplishments is numerous and that hopefully we have had a major impact on the breed that we love so much. Maybe, it will be evident in the catalog that we have put our heart and soul into the development of this program and the development of the Limousin breed. Rest assured, we will not disappear from the breed entirely and we hope that we will always be involved in the breed in some capacity, just not at the level of the past. One of the major objectives that Fred has always stressed at Deer Valley is his love and support of the youth in this breed and he has stated that he intends to continue to support the youth and be involved as much as possible.

With the expansion of our Angus operation we continually find it extremely hard to balance two breeds and put forth the necessary effort and resources required to succeed in both breeds and therefore have decided to try and concentrate on one breed and put forth all of our resources and effort to make that endeavor as prosperous as possible. For this reason and this reason only we will be offering a once in a lifetime chance for you to participate in the chance to acquire 21 years of genetic improvement and the one time chance to actually acquire the core and seed of this great program. You will have the chance to not only buy offspring from the great donors that built this program but the opportunity to actually buy the great donors that built this program along with all of their embryo inventory and production. You will have a chance to buy the Herd Sires that we have built with and the entire semen inventory that will include some of the most sought after sires that the breed has ever known. Some of them are so rare that you have not had an opportunity to acquire semen from them in years. Don't miss this chance.

Make sure you come early as there will be a lot of individuals to go through and you will not want to miss a one. There will be a tremendous group of ET babies as well that will sell along side their recip mothers. Let us know if you need more information than you find in this catalog. We have years of records on the cow families and can help you with any of that. If we can help you in any other way do not hesitate to call and let us know. We will look forward to seeing you all here on that monumental day that the world will have a chance to finally dig in our treasure chest and take home the pieces that you never thought would be available.

Sincerely,
Jonathan Perry
